Chief Clerk of the Commission
Public Service Commission of South Carolina
Post Office Drawer 11649
Columbia, South Carolina 29211

Re: Application of BellSouth Telecommunications, Inc. to Provide In-Region
InterLATA Services Pursuant to Section 271 of the Telecommunications
Act of 1996
Docket No. 2001-209-C

Dear Mr. Terreni:

Consistent with Appendix F of the Service Quality Measurements Plan adopted by this Commission on July 18, 2005, BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina ("AT&T") is filing the original and one copy of the Preliminary Data Notification Report for the July 2007 data month. The July 2007 changes will be discussed at the May 7, 2007 industry conference call.

Sincerely,

Patrick W. Turner

PWT/nml

Enclosure

cc: All Parties of Record
675855

PRELIMINARY JULY 2007 DATA NOTIFICATION

BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina ("AT&T") is considering making the changes described in this document to generate results for the July 2007 data month. Results for the July 2007 data month will be posted as follows:

Preliminary results	August 20, 2007
Final results	August 31, 2007

AT&T provides Data Notifications each month in compliance with the SQM Plan. This order specifies that when AT&T proposes making any changes to the methods by which performance data is calculated, it must provide written notice. This notice must be provided on the first business day of the month before the data month in which the change will be made. AT&T must also provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LEO, LESOG, etc.) that PMAP uses to calculate measurements. AT&T will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

System releases related to the merger between BellSouth and AT&T may affect monthly data flows from the source systems that PMAP uses to calculate measurements. AT&T will make changes to PMAP to ensure that data continues to be correctly captured as system changes are implemented.

Provisioning Measurements

(1) *Affected Measures:* P-4 (OCI)

Description of Change: Currently, AT&T has identified instances where the service order is not correctly being associated with the latest version of the LSR. AT&T proposes to modify PMAP to capture the latest version of the LSR for these orders by performing additional lookups to provide this information. (RQ9033)

Impact of Change: For December 2006 data, the metric for UNE ISDN/IDSL/UDN in Georgia would not change.

For December 2006 data, the metric for UNE ISDN/IDSL/UDN in Florida would increase from 10.00 days to 10.78 days.

(2) *Affected Measures:* P-4 (OCI) Georgia & Kentucky Only

Description of Change: Currently, PMAP is doubling the numerator on the Aggregate reports for the product UNE Other Non-design, < 6 circuits, Dispatch. AT&T proposes to

modify PMAP so that the numerator on the Aggregate reports matches the numerator and metric on the 12-month reports. (RQ9098)

Impact of Change: The numerator and metric on the Aggregate reports will match the CLEC numerator and metric on the 12-month reports for the product group UNE Other Non-Design, < 6 circuits, Dispatch, in Georgia and Kentucky.

(3) *Affected Measures:* P-4 (OCI)

Description of Change: Currently, when calculating the OCI durations for service order records, which either start or end on a holiday, PMAP is adding a day to the duration. AT&T proposes to modify PMAP to use only valid business days in the calculation of the interval, which is in accordance with the business rules for this measure in the Regional SQM. (RQ9099)

Impact of Change: For January 2007 data, Florida Resale Residence orders, Non-Design, Non-dispatch, < 6 circuits would change from .55 days to .50 days and Retail Residence orders, Non-Design, Non-dispatch, < 6 circuits would not change.

For January 2007 data, Georgia Resale Residence orders, Non-Design, Non-dispatch, < 6 circuits had no change and Retail Residence orders, Non-Design, Non-dispatch, < 6 circuits would change from .75 days to .50 days.

(4) *Affected Measures:* P-11 (SOA)

Description of Change: Currently, there is a semicolon in front of the FID value in a section of the SOAC code, which is causing a field in the records not to be updated. AT&T proposes to remove this semicolon from the code. (RQ8901)

Impact of Change: For February 2007 data, there was no change to the metric in Florida or Georgia.

M&R Measurements

(5) *Affected Measures:* M&R-2 (CTRR)

Description of Change: Currently, some pseudo circuit IDs and trouble tickets are being created in WFA, which are not for active circuits and are created for administrative tracking purposes. AT&T proposes to remove these pseudo circuit IDs and their related trouble tickets from the data, which is in accordance with the exclusions for this measure in the Regional SQM. (RQ8543)

Impact of Change: For February 2007 data, there was no change to the metric in Florida or Georgia.

Special Access Measurements

(6) *Affected Measures:* SA-1 (FOCT)

Description of Change: Currently, PMAP is not reporting the correct numerator on the 12-month report for FOCT. PMAP is only reporting the $> 0 - \leq 2$ days data, which should also include the “0 day” data as well. AT&T proposes to add the “0 day” data to the numerator. (RQ9157)

Impact of Change: For February 2007 data, the IXC metric for DS1 in Florida would change from 25.53% to 95.03% for the ≤ 2 days date interval.
